SCOPE
This procedure applies to all buildings owned and/or under the control of Monash University within Australia. Instances whereby buildings fall outside the scope of this procedure should be referred to Monash Occupational Health & Safety (OH&S) for consideration.

PROCEDURE STATEMENT
This procedure set out the requirements for the treatment and notification of Legionella bacteria and elevated bacterial levels in cooling tower water and confirmed cases of Legionnaires disease at Monash University.

2. Notification Procedures

2.1 Prescribed Action Levels for Bacteria/Legionella Testing of Cooling Tower Water

Cooling Tower Testing and Notification Procedure

2.2 Confirmed Case(s) of Legionnaires Disease

Notification Procedure in Confirmed Case(s) of Legionnaires Disease

Undertake immediate testing of all suspect towers. Reporting in accordance with Testing and Notification Procedures.
3. Responsibility for Implementation

3.1 A comprehensive list of OHS responsibilities is provided in the OHS Roles, Responsibilities and Committees Procedure. A summary of the specific responsibilities with respect to bacterial testing of cooling towers is provided below.

3.1.1 Services (Building Maintenance), BPD: Services staff must:
- Manage the testing of HCC in the cooling tower water in order to detect the levels of Legionella species and HCC;
- Notify Monash Occupational Health & Safety (OH&S) if:
  - 3 consecutive detections of Legionella species (≥10CFU/mL); or
  - 3 consecutive elevated HCC (≥100,000CFU/mL) are detected in cooling tower water (from the same tower);
- Advise OH&S of the need to re-test cooling tower/s water following notification from the Department of Health and Human Services (DHHS) of confirmed case/s of Legionnaires disease.

3.1.2 Monash Occupational Health & Safety (OH&S): OH&S must:
- When notified by Services staff of Legionella detection and/or elevated HCC in cooling tower water, communicate with all relevant parties within the university as detailed in these procedures;
- When notified by Services staff of three consecutive detections of Legionella species (≥10CFU/mL), communicate with DHHS, as detailed in these procedures;
- Send notification reports of three consecutive detections of Legionella bacteria in cooling tower water to DHHS;
- When notified by DHHS of confirmed case(s) of Legionnaires disease, communicate with the relevant department, and Dean of faculty, if multiple cases are reported;
- Update these notification procedures, as required.

4. Records

4.1 For OHS Records document retention please refer to: OHS Records Management Procedure.

DEFINITIONS

A comprehensive list of definitions is provided in the Definitions tool. Definitions specific to this procedure are provided below.

<table>
<thead>
<tr>
<th>Key word</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Bacteria Count/Heterotrophic Colony Count</td>
<td>Heterotrophic colony count is an estimate of the number of viable units of bacteria per millilitre of water made using the pour plate, spread plate or membrane filter test. It is used as an indicator of water quality in cooling water systems. HCC is also known as total bacteria count (TBC), total plate count or viable bacteria count test. It is reported as the number of colony forming units per millilitre of sample (CFU/mL). For the remainder of these procedures, bacteria levels will be referred to as HCC.</td>
</tr>
</tbody>

<tr>
<th>Version</th>
<th>Date Approved</th>
<th>Changes made to document</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>April 2009</td>
<td>Notification procedures for prescribed action levels for bacterial/legionella testing of cooling tower water, and confirmed case/s of Legionella Disease, v3</td>
</tr>
</tbody>
</table>
| 4       | June 2014     | 1. Changed title to Bacterial Testing of Cooling Towers Procedure  
2. Added link to definitions document  
3. Updated responsibilities section to name maintenance and minor work as the responsible section of FSD for testing.  
4. Added tools associated with this document. |
<table>
<thead>
<tr>
<th>Version</th>
<th>Date of next review</th>
<th>Changes</th>
</tr>
</thead>
</table>
| 5.3     | July 21           | 1. Updated certification logo to ISO 45001 in the footer  
|         |                   | 2. Added the Standard ISO 45001 under “Associated procedures” in the Governance table  
|         |                   | 3. Updated OHS Policy under ‘Parent Policy’ to OHS&W Policy  |
| 5.2     | September 2020    | 1. Added references to Building (Legionella) Act and Building (Legionella Risk Management) (Amendment) Regulations 2002  
|         |                   | 3. Removed references to AS/NZS 2243.1: 2005 Safety in Laboratories Part 1 - Planning and operational aspects and 2243.2: 2006 Safety in Laboratories Part 2 - Chemical aspects as irrelevant  
|         |                   | 5. Removed reference to deleted information sheet Risk management of cooling towers OHS information sheet  |
| 5.1     | August 2017       | 1. Updated logos in header  
|         |                   | 2. Updated OHS Regulations to 2017  |
| 5       | May 2017          | 1. Updated to reflect changed organisational structure in Buildings and Property Division  
|         |                   | 2. Updated flowchart to clarify triggering of additional actions after 3rd positive test.  
|         |                   | 3. Updated Records, Compliance and References sections  |
| 4.1     | May 2016          | 1. Updated flowchart with contact details  
|         |                   | 2. Changed names to reflect changes in organisational structure  |
